

RGF Environmental Group began development of this information in 1985 and refinements continue to provide industry with a complete one-stop source for all their environmental equipment needs. The engineering and design information section will provide technical data necessary to properly design a total system or improve an existing system. **RGF** Environmental Systems, Inc. also offers an in-house total turnkey program from conceptual design to start-up, which will qualify you for our five (5) year warranty program.

The first step is to have our factory trained Distributor or Representative send a water sample with a completed Site Evaluation Form to **RGF** for a free analysis and evaluation. Should we find a suitable solution for your pollution problem, **RGF** will provide a conceptual drawing and proposal outlining our plan. Final designs are then translated into a design engineering and construction drawing by **RGF** or your professional architect/engineer/designer.

RGF

Conceptual Site Drawing

Amt.	Description	Price
1	12' x 20' Enviro-Center	
1	Ultrasorb Model ST ²	
1	Model OWS-50 Oil Water Separator	
1	OP-048 Sump Assembly	
1	FS-30 Portable Floc System	
6	OP-076 Trench Screen	
1	Remote Location Control Panel	
1	PU-033 1/3 h.p. Sump Pump	
1	20' x 40' RGF Shed System	
1	Standard 20' x 60' Wash Pad
